This booklet contains modifications to the management plan for the Pinal Active Management Area ("AMA") for the third management period, 2000 to 2010 ("Third Management Plan"). The Third Management Plan was adopted by the Director of Water Resources ("Director") in December 1999. It is the third in a series of five management plans mandated by the 1980 Groundwater Management Act ("Act"). As required by the Act, the Third Management Plan contains mandatory conservation requirements for persons withdrawing, distributing or using groundwater within the Pinal AMA. The Third Management Plan also contains a Groundwater Quality Management Program, an Augmentation and Recharge Program, a Water Management Assistance Program and a chapter on plan implementation.

The Third Management Plan was modified in 2003 to comply with legislation enacted in 2002 requiring the Director to calculate irrigation water duties for most farms regulated under the Base Agricultural Conservation Program using an irrigation efficiency of 80 percent and requiring the Director to include as a modification to the Third Management Plan an Agricultural Best Management Practices Program as an alternative to the Base Program. At that time, modifications were also made to the Municipal and Industrial Conservation Programs, as well as to the Water Management Assistance Program.

The modifications contained in this booklet were adopted by the Director on April 1, 2008, and became effective on May 20, 2008. The following is a description of the modifications:

1. The Director modified the Non-Per Capita Conservation Program ("NPCCP") for large municipal providers in the municipal conservation program of the Third Management Plan as required by legislation enacted during the 2007 legislative session (Laws 2007, Ch. 139). Under the modified NPCCP, all large municipal providers that are not designated as having an assured water supply and that are not regulated as a large untreated water provider or as an institutional provider must submit a provider profile to the Director by July 1, 2009 and be regulated under the modified NPCCP beginning January 1, 2010 or the date the Director approves the provider's provider profile, whichever is later. Large municipal providers regulated under the modified NPCCP must implement a public education program, a metering program and one or more additional water conservation measures to be selected from a list of measures included in the program. The number of additional water conservation measures that a provider must implement is determined by the number of service connections to the provider's water distribution system.

A large municipal provider designated as having an assured water supply will continue to be regulated under its existing municipal conservation program unless it elects to be regulated under the modified NPCCP. The conservation program for small municipal providers, whose average annual use is less than 250 acre-feet, is unaffected by the modifications.

2. The Director made a number of conforming changes to the text of Chapter 5 of the Third Management Plan, as well as to the municipal conservation and monitoring and reporting requirements and the appendices.

The official language of the modifications described above is set forth in the pages that follow. The Arizona Department of Water Resources appreciates the input it received from the Pinal AMA Groundwater Users Advisory Council and the large group of public stakeholders in developing the modifications. Anyone desiring more information about the modifications or the Third Management Plan should contact the Pinal AMA office at 520-836-4857.

Sincerely,

5.1 INTRODUCTION

[No change]

5.2 STATUTORY PROVISIONS

5.2.1 Per Capita Requirements for Large Municipal Providers

The Code requires that the management plans for each AMA include a conservation program for municipal uses. For the First, Second, and Third Management Plans, the Code expressly mandates that the programs require reasonable reductions in per capita use. A.R.S. §§ 45-564(A)(2), 45-565(A)(2) and 45-566(A)(2).

To comply with this mandate the Department developed the Total GPCD Program. As originally enacted, the Code did not exempt any municipal providers from the requirement to achieve reductions in per capita use. Consequently, the Municipal Conservation Program for the First Management Plan established maximum GPCD requirements for all municipal providers, regardless of size.

In 1986, the Legislature amended the statutes governing the Second and Third Management Plans to exempt “small municipal providers” from the requirement to achieve reasonable reductions in per capita use. Laws 1986, Ch. 107, §§ 2 and 3. Instead of requiring small municipal providers to achieve reductions in per capita use, the statutes require the director to establish “reasonable conservation requirements for small municipal providers.” A.R.S. §§ 45-565(A)(4) and 45-566(A)(4). Until 1994, “small municipal provider” was defined in the Code as “a city, town, private water company, or irrigation district that supplies water for non-irrigation use, serves less than 500 people and supplies less than 100 acre-feet of water for non-irrigation use during a calendar year.” Laws 1986, Ch. 107, § 1. In 1994, the Legislature changed the definition of small municipal provider to “a municipal provider that supplies 250 acre-feet or less of water for non-irrigation use during a calendar year.” A.R.S. § 45-561(13).

~~Two~~ THREE other statutory amendments have created exceptions to the requirement that municipal providers achieve reasonable reductions in per capita use. In 1991, the Legislature exempted large untreated water providers from the requirement to achieve reductions in per capita use. Laws 1991, Ch. 211, §§ 16, 17, and 18. In 1992, the Legislature enacted legislation requiring the director to include in each management plan a Non-Per Capita Conservation Program (NPCCP) for large municipal providers as an optional, alternative program to the program requiring reductions in per capita use. Laws 1992, Ch. 183 §§ 5, 7, and 9. IN 2007, THE LEGISLATURE ENACTED LEGISLATION REQUIRING THE DIRECTOR TO MODIFY THE NON-PER CAPITA CONSERVATION PROGRAM IN THE THIRD MANAGEMENT PLAN. THE 2007 LEGISLATION REQUIRES ALL LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT LARGE UNTREATED WATER PROVIDERS TO BE REGULATED UNDER THE NEW NON-PER CAPITA CONSERVATION PROGRAM BEGINNING JANUARY 1, 2010, OR THE DATE THEIR PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. LARGE MUNICIPAL PROVIDERS THAT ARE DESIGNATED AS HAVING AN ASSURED WATER SUPPLY MAY ELECT TO BE REGULATED UNDER THE NPCCP. Those amendments are described in greater detail in the following two sections.

5.2.2 Conservation Requirements for Large Untreated Providers

[No change]

5.2.3 Non-Per Capita Conservation Requirements for Large Municipal Providers

In 1992, the Legislature enacted legislation requiring the Department to include in the management plans an NPCCP as an optional, alternative program to the program requiring reasonable reductions in per capita use. THE LEGISLATION REQUIRED each provider regulated under the NPCCP is required to implement specific residential and non-residential conservation programs for interior and exterior water use, a public education program relating to water conservation, and a program to meter most service area connections. Additionally, providers that are regulated under the NPCCP are WERE required to either reduce their groundwater pumping consistent with the AWS Rules (A.A.C. R12-15-701, *et seq.*) or eliminate their use of mined groundwater by the year 2010. The NPCCP is a performance-based program with compliance determined by the effective implementation of stipulated conservation measures and the required groundwater reduction. For the Third Management Plan, the statutory requirements for the NPCCP are found at A.R.S. § 45-566.04. AS ORIGINALLY ADOPTED, THE THIRD MANAGEMENT PLAN INCLUDED A NPCCP CONTAINING THESE REQUIREMENTS. NO LARGE MUNICIPAL PROVIDERS IN THE PINAL AMA APPLIED FOR REGULATION UNDER THIS PROGRAM, HOWEVER.

IN 2007, LEGISLATION WAS ENACTED REQUIRING THE DIRECTOR TO MODIFY THE THIRD MANAGEMENT PLAN TO REPLACE THE PREVIOUSLY ADOPTED NPCCP WITH A NEW NPCCP. THE LEGISLATION PROVIDES THAT THE NEW NPCCP SHALL REQUIRE A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE PROGRAM TO IMPLEMENT WATER CONSERVATION MEASURES WITHIN ITS SERVICE AREA, INCLUDING A PUBLIC EDUCATION PROGRAM, A METERING PROGRAM AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES. THE DIRECTOR IS REQUIRED TO INCLUDE IN THE MANAGEMENT PLAN A LIST OF WATER CONSERVATION MEASURES THAT A PROVIDER MUST SELECT FROM TO COMPLY WITH THE NPCCP. THE DIRECTOR MUST DESIGN THE NEW NPCCP TO ACHIEVE A WATER USE EFFICIENCY WITHIN THE SERVICE AREAS OF PROVIDER'S REGULATED UNDER THE PROGRAM EQUIVALENT TO THE WATER USE EFFICIENCY ASSUMED BY THE DIRECTOR IN ESTABLISHING THEIR TOTAL GPCD REQUIREMENTS. UNLIKE THE PREVIOUS NPCCP, THERE IS NO REQUIREMENT THAT A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NEW NPCCP LIMIT ITS GROUNDWATER USE TO A SPECIFIED VOLUME WHILE REGULATED UNDER THE PROGRAM.

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS A LARGE UNTREATED WATER PROVIDER OR AN INSTITUTIONAL PROVIDER IS REQUIRED TO BE REGULATED UNDER THE NEW NPCCP BEGINNING JANUARY 1, 2010, OR THE DATE THE PROVIDER'S PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. HOWEVER, A LARGE MUNICIPAL PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE BEFORE THAT DATE. ALTHOUGH LARGE MUNICIPAL PROVIDERS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY ARE NOT REQUIRED TO BE REGULATED UNDER THE NPCCP, THEY MAY ELECT TO BE REGULATED UNDER THE PROGRAM BY SUBMITTING TO THE DIRECTOR A WRITTEN NOTICE OF THE ELECTION AND A PROVIDER PROFILE THAT IS SUBSEQUENTLY APPROVED BY THE DIRECTOR. THE NPCCP IS SET FORTH IN SECTION 5-104 OF THE THIRD MANAGEMENT PLAN.

5.4.1 Consistency With Management Goal

In order to demonstrate that a proposed use is consistent with the management goal for the Pinal AMA, the AWS Rules require that, in most cases, applicants TO demonstrate that renewable supplies, including groundwater replenished by CAGR, will be used to satisfy that portion MOST of the water demand of the development or water service area in excess of 125 GPCD for 100 years. A.A.C. R12-15-705722. For a municipal provider applying for a Designation of AWS, this means that a significant portion of the water demand for both existing and new customers must be met with water supplies other than mined groundwater.

5.4.2 Consistency With Management Plan

In order to demonstrate consistency with the AMA's management plan, the AWS Rules generally require that an applicant be in compliance with its management plan requirements. For municipal providers, the applicable management plan requirements are the municipal provider conservation requirements set forth in section 5.12 of this chapter. Thus, if a municipal provider applying for Designation of AWS is regulated under the Total GPCD Program, the provider must be in compliance with its total GPCD requirement, or the terms of a stipulation and consent order entered into to remedy non-compliance with the GPCD requirement, in order to demonstrate consistency with the management plan. See A.A.C. R12-15-706(B) 721(A)(1).

An applicant for a Certificate of AWS is not subject to the municipal conservation requirements set forth in the management plan because the applicant is not a municipal provider as defined in A.R.S.

§ 45-561. However, certain uses that may be associated with a certificate application, such as turf-related facilities, large-scale cooling facilities, and landscaping or water features in publicly owned right-of-way, are subject to the individual user requirements in sections 5-112(A) of the municipal conservation requirements if groundwater will be used. For all individual users, whether served by a designated or undesignated provider, either the entity delivering water or the individual user (e.g., homeowners association, turf-related facility owner, etc.) will be responsible for compliance with the individual user requirements.

The water use of a new subdivision will also affect a large municipal provider's ability to meet its GPCD target. While the individual users or the entity delivering water to them are responsible for meeting the individual user requirements, new subdivisions should be developed in a manner consistent with the municipal provider's conservation requirements in the management plan. This could be accomplished by some relatively simple and voluntary efforts by the certificate applicant or the homebuilder. A few examples are:

- Establish Conditions, Covenants and Restrictions or other conditions that will limit landscaping within the subdivision

- Provide lot buyers with written water conservation information, including irrigation management of automatic irrigation timers
- Landscape model homes in accordance with Xeriscape™ principles
- Feature water conservation fixtures and appliances in model homes
- Limit the water intensive landscaped area in common areas to those areas that provide significant recreational benefits
- Provide low water use landscaping packages to home buyers
- Locate hot water heaters to minimize long hot water pipe run or install looped systems

An application for a Certificate of AWS requires submittal of general information to allow the Department to estimate the water demand of the subdivision. These include submittal of any Conditions, Covenants and Restrictions or other conditions that will limit exterior water demand and any proposed conservation practices, policies, devices, etc. that may be utilized.

5.6 MUNICIPAL PROGRAM ISSUES

[No change]

5.6.1 Private Water Company Issues

Some municipal providers regulated under the municipal conservation program are privately-owned companies separate from the city, town, or county in which they are located. While local plumbing and landscape ordinances may apply within the private water company service area, the water company itself lacks the authority to enact ordinances regulating water use by its customers. In addition to being regulated by the Department, private water companies are regulated by the Arizona Corporation Commission (ACC), an elected body whose mission includes exercising exclusive state regulatory authority over public service corporations (public utilities) in the public interest. The ACC monitors the operations of approximately 350 private water utility companies throughout Arizona, reviewing company financial records and recommending revenue requirements and rates and charges to be collected. The regulatory responsibilities of the ACC are fully defined in Article XV of the Arizona Constitution and §§ 40-201, *et seq.*, Arizona Revised Statutes, including A.R.S. § 40-250, requiring that all public service corporations obtain ACC approval before establishing or changing any rate.

Private water companies have raised several issues regarding the relationship of the Department's requirements and the ACC's review of rate recovery associated with the requirements. The most significant issues identified include: (1) the perception of uncertainty in the ability to recover the holding costs of CAP subcontracts and financing the construction of facilities for receipt and use of renewable supplies, and (2) the impact of the ACC's position in rate cases that implementation of conservation programs is discretionary, because the Department does not identify specific conservation programs or measures needed to be carried out by the provider.

These issues have been extensively reviewed and discussed by the Department staff, private water company representatives and ACC staff. The ACC has indicated that "although they cannot guarantee recovery of costs prior to their incurrence" they would consider cost recovery for the use of renewable supplies and the implementation of conservation measures, applying the principles of "used and useful" and "least-cost alternative." In the past, these principles have meant that a provider would have to be actively providing a resource in order to recover costs and any conservation measure implemented would have to be the most cost-effective option before the recovery of costs would be allowed. Private water companies argue that these principles do not guarantee cost recovery as they are considered by the ACC on a case-by-case basis.

~~During the development of the Third Management Plan, the Department explored the possibility of establishing a municipal conservation program designed exclusively for private water companies. In order to meet the goals of the Department and obtain the support of the ACC, the Department considered a program that would mandate specific conservation measures and reduce reliance on groundwater supplies. Upon further examination, it was determined that additional statutory authority would be needed to implement such a program. It was decided by the Department not to pursue this action at this time. However, Department staff, with the cooperation of the regulated community, will continue to explore options, including continued dialogue between the two agencies aimed at establishing a united strategy in achieving the most economically efficient reduction in reliance on mined groundwater by private water companies including providing more certainty of cost recovery for providers.~~

5.7 THIRD MANAGEMENT PLAN MUNICIPAL CONSERVATION PROGRAM

[No change]

5.7.1 Conservation Requirements for Large Municipal Providers

In order to establish TOTAL GALLONS PER CAPITA PER DAY conservation requirements for providers in the Second Management Plan, the Department identified existing water use patterns and service area characteristics that influenced a provider's water conservation potential. Assumptions about future service area population growth and water supply and demand were also included in the analysis. This assessment was referred to as the "municipal provider profile." For the Third Management Plan, the Department used a similar approach to identify service area water use characteristics. Information was gathered through annual water use reports including water deliveries and supplies, and the number of housing units that were added to the service area annually. Additional information included annual population estimates based on the provider supplied housing unit information from the annual reports, Arizona Department of Economic Security persons per housing unit data, and individual interviews conducted to determine existing water conservation programs were used to determine water conservation potential for each large municipal provider. This conservation potential was applied to existing GPCD figures, and a total GPCD reduction was assigned to each provider. The total reduction, to be achieved by 2000, was phased in with intermediate GPCD reductions called for in 1992 and 1995.

EXCEPT AS PROVIDED IN THE NEXT PARAGRAPH, the Code requires additional reasonable reductions in per capita use by large municipal providers in the Third Management Plan. Pursuant to this statutory requirement, the Department will calculate a total GPCD requirement for each large municipal provider. However, the Department will not initially combine the water use components into a pre-assigned total GPCD requirement. Instead, in order to eliminate the uncertainty of population projections, each component is assigned a separate water use rate, with a total GPCD requirement calculated each year based on actual population growth within the service area. As in the Second Management Plan, there will be two intermediates and a final GPCD requirement for all large municipal providers. Each large municipal provider will be noticed of the total GPCD requirements for its service area. Providers may apply for a variance from or administrative review of the conservation requirements within 90 days after the notice from the director is given. Alternatively, a large municipal provider DESIGNATED AS HAVING AN ASSURED WATER SUPPLY may apply for one of the alternative programs: the NPCCP, the ACP, or the IPP OR MAY ELECT TO BE REGULATED UNDER THE NPCCP. ~~Large municipal providers that do not apply for an alternative program will be regulated under the Total GPCD Program.~~

PURSUANT TO LEGISLATION ENACTED IN 2007, LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT REGULATED AS A LARGE UNTREATED WATER PROVIDER OR AN INSTITUTIONAL PROVIDER WILL BE REGULATED UNDER THE NPCCP SET FORTH IN SECTION 5-104 BEGINNING ON JANUARY 1, 2010, OR THE DATE THE PROVIDER'S PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. HOWEVER, THE PROVIDER MAY VOLUNTARILY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE PURSUANT TO SECTION 5-104(B) PRIOR TO THAT DATE. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY MAY ELECT TO BE REGULATED UNDER THE NPCCP BY SUBMITTING A WRITTEN NOTICE OF THE ELECTION TO THE DIRECTOR, TOGETHER WITH A PROVIDER PROFILE THAT IS SUBSEQUENTLY APPROVED BY THE DIRECTOR PURSUANT TO SECTION 5-104(B). A LARGE MUNICIPAL PROVIDER

REGULATED UNDER THE INSTITUTIONAL PROVIDER PROGRAM DESCRIBED IN SECTION 5.7.1.4 SHALL CONTINUE TO BE REGULATED UNDER THAT PROGRAM.

Additionally, requirements have been established for large untreated providers and small municipal providers. This section describes the Third Management Plan Municipal Conservation Program and how it was developed, the alternative programs, the large untreated provider program, and the conservation requirements for small municipal providers. For a legal description of the requirements for each of these programs, please refer to the municipal conservation requirements at the end of this chapter (see section 5.12).

5.7.1.1 Total Gallons Per Capita Day Program

As in previous management periods, EXCEPT AS PROVIDED IN SECTION 5.7.1.2, the base municipal program for the Third Management Plan will be the Total GPCD Program. All large municipal providers are legally noticed of its total GPCD requirements under the management plan. These conservation requirements limit the annual gallons per capita per day water usage within each municipal provider's service area to the amount allowed under its total GPCD requirements.

5.7.1.2 Non-Per Capita Conservation Program

The NPCCP was added to the Second Management Plan in 1995 after being developed in cooperation with representatives of the water-using community. This program requires a provider to implement specific conservation measures within its service area instead requiring compliance with per capita conservation requirements. A provider in this program must implement RCMs for interior and exterior residential water uses and interior and exterior non-residential uses, as well as an education program. The RCMs must be designed to result in water use efficiency within the provider's service area equivalent to the water use efficiency assumed in the provider's total GPCD requirement. The Department has established a list of standard RCMs that are designed to achieve an efficiency equivalent to the assumptions used in the Total GPCD Program. However, if the standard RCMs do not fit the service area characteristics of a provider, the program allows the provider the flexibility to substitute measures that are designed to achieve the same savings yet fit the unique characteristics of the provider's service area. For the third management period, the Department will establish a steering committee to assist the Department in reviewing the existing RCMs outlined below, the substitute RCMs contained in Appendix 5F.4, and development of monitoring and reporting requirements that would benefit the administration of alternative programs (the NPCCP and the ACP). This steering committee will be made up primarily of Department staff and large municipal providers that are regulated under an alternative program. Other persons whom the director considers beneficial may also be included.

5.7.1.2.1 Groundwater Use Reduction Requirement

The provider must meet one of the following requirements to be eligible to participate in the NPCCP: (1) the provider must be a member of a groundwater replenishment district, (2) the provider must be designated as having a 100-year assured water supply under the Department's AWS Rules, or (3) the provider must implement a plan to eliminate mined groundwater withdrawals by the year 2010 using a volumetric reduction defined in A.R.S. § 45-566.01(3)(A).

5.7.1.2.2 Reasonable Conservation Measures

A set of standard residential, non-residential, and education RCMs were developed for the NPCCP. Each RCM prescribes actions that must be taken by the provider to achieve water use efficiencies in each sector. Providers that have already implemented these measures will be required to implement additional conservation measures, consistent with the conservation potential for their service area, to qualify for the program. Additional substitute RCMs were developed for providers to allow for additional flexibility to develop a conservation program for the provider that meets the characteristics of each service area. In order for a provider to use a substitute RCM in place of a standard RCM, the provider must apply to the director and demonstrate that the substitute RCM will be designed to achieve a water use efficiency equivalent to the standard RCM if the requested substitute RCM is in the same water use category as the standard RCM or is a system-related substitute RCM, or designed to achieve a greater water use efficiency if the substitute RCM is not a system-related RCM and is from a different water use category than that of the standard RCM. The director will not approve a substitution of standard RCMs that would result in the provider implementing no RCMs in a water use category. An outline of the standard RCMs is listed below. For a detailed description of each RCM, including the substitute RCMs, refer to Appendix 5F.1-F.4.

5.7.1.2.3 Compliance with the Non-Per Capita Conservation Program

A large municipal provider regulated under the NPCCP is in compliance with the program if it implements the agreed to RCMs and limits its use of groundwater to the amount allowed under the AWS Rules or the amount allowed by the groundwater reduction requirement, whichever is applicable. The Department will use the written agreement for the NPCCP to monitor progress with the program. Each year, along with the Annual Water Withdrawal and Use Report, the municipal provider will be required to submit a progress report describing the implementation of each RCM, the cost of implementing the program, estimated or actual water savings, and a description of any difficulties with the program. Providers regulated under the NPCCP will also be required to comply with the individual user, distribution system, and monitoring and reporting requirements contained in this chapter.

5.7.1.2 Non-Per Capita Conservation Program

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS A LARGE UNTREATED WATER PROVIDER OR AN INSTITUTIONAL PROVIDER WILL BE REGULATED UNDER THE NPCCP BEGINNING JANUARY 1, 2010, OR THE DATE ITS PROVIDER PROFILE IS APPROVED BY THE DIRECTOR AS PROVIDED IN SECTION 5.7.1.2.1, WHICHEVER IS LATER. THE LARGE MUNICIPAL PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROVIDER PROFILE PRIOR TO THAT DATE. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY MAY ELECT TO BE REGULATED UNDER THE

NPCCP BY PROVIDING WRITTEN NOTICE OF THE ELECTION TO THE DIRECTOR, WHICH MUST INCLUDE A PROVIDER PROFILE AS DESCRIBED IN SECTION 5.7.1.2.1. THE PROVIDER WILL BE REGULATED UNDER THE NPCCP IF THE DIRECTOR APPROVES THE PROVIDER PROFILE. A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP IS EXEMPT FROM THE REQUIREMENTS OF THE TOTAL GPCD PROGRAM.

THE NPCCP IS A PERFORMANCE-BASED PROGRAM. EACH YEAR WHILE REGULATED UNDER THE PROGRAM, A PROVIDER MUST COMPLY WITH THE METERING REQUIREMENTS IN SECTION 5-114(6) AND IMPLEMENT A PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES WITHIN ITS SERVICE AREA. THE NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES THAT MUST BE IMPLEMENTED DEPENDS ON THE TOTAL NUMBER OF RESIDENTIAL AND NON-RESIDENTIAL SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM AND THE TIER LEVEL FOR THAT NUMBER OF CONNECTIONS (SEE SECTION 5.7.1.2.2). THE PROVIDER MUST SELECT THE ADDITIONAL WATER CONSERVATION MEASURES FROM A LIST OF MEASURES APPROVED BY THE DIRECTOR. THE INITIAL LIST OF APPROVED ADDITIONAL WATER CONSERVATION MEASURES IS SET FORTH IN APPENDIX 5K. THE DIRECTOR MAY MODIFY THE LIST TO INCLUDE ADDITIONAL WATER CONSERVATION MEASURES PURSUANT TO THE PROCEDURE SET FORTH IN APPENDIX 5K. ALL ADDITIONAL WATER CONSERVATION MEASURES SELECTED BY THE PROVIDER MUST BE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

THE PROVIDER MUST IDENTIFY THE WATER CONSERVATION MEASURES THAT IT WILL IMPLEMENT IN ITS PROVIDER PROFILE THAT MUST BE SUBMITTED TO THE DIRECTOR BEFORE THE PROVIDER IS REGULATED UNDER THE NPCCP. IF THE DIRECTOR APPROVES THE PROVIDER PROFILE, THE PROVIDER MUST IMPLEMENT THE WATER CONSERVATION MEASURES IDENTIFIED IN THE PROVIDER PROFILE, UNLESS THE PROVIDER IMPLEMENTS A SUBSTITUTE WATER CONSERVATION MEASURE AS DESCRIBED IN SECTION 5.7.1.2.2. IF THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM INCREASES TO A HIGHER TIER LEVEL AFTER THE PROVIDER'S PROVIDER PROFILE HAS BEEN APPROVED BY THE DIRECTOR, THE PROVIDER MUST SUBMIT TO THE DIRECTOR A NEW PROVIDER PROFILE WITH THE APPROPRIATE NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES FOR THE NEW TIER LEVEL. THE PROVIDER MUST BEGIN IMPLEMENTING ALL OF THE WATER CONSERVATION MEASURES DESCRIBED IN THE NEW PROVIDER PROFILE WHEN IT IS APPROVED BY THE DIRECTOR.

5.7.1.2.1 PROVIDER PROFILE

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS A LARGE UNTREATED WATER PROVIDER OR AN INSTITUTIONAL PROVIDER MUST SUBMIT A PROVIDER PROFILE TO THE DIRECTOR ON OR BEFORE JULY 1, 2009, OR WITHIN SIX MONTHS AFTER FIRST RECEIVING WRITTEN NOTICE OF ITS THIRD MANAGEMENT PLAN CONSERVATION REQUIREMENTS FROM THE DIRECTOR, WHICHEVER IS LATER. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ELECTS TO BE REGULATED UNDER THE NPCCP MUST SUBMIT A PROVIDER PROFILE TO THE DIRECTOR AT THE TIME THE PROVIDER GIVES WRITTEN NOTICE OF THE ELECTION TO THE DIRECTOR.

A PROVIDER PROFILE MUST CONTAIN THE FOLLOWING INFORMATION: (1) A DESCRIPTION OF THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS AND

WATER USE PATTERNS; (2) A DESCRIPTION OF THE CONSERVATION MEASURES THE PROVIDER IS CURRENTLY IMPLEMENTING; (3) A DESCRIPTION OF THE PUBLIC EDUCATION PROGRAM AND ADDITIONAL WATER CONSERVATION MEASURES THAT THE PROVIDER INTENDS TO IMPLEMENT TO COMPLY WITH THE NPCCP; AND (4) AN EXPLANATION OF HOW THE ADDITIONAL WATER CONSERVATION MEASURES ARE RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS. WITHIN 90 DAYS AFTER RECEIVING A PROVIDER PROFILE, THE DIRECTOR MUST EITHER APPROVE OR DISAPPROVE THE PROVIDER PROFILE AND SEND WRITTEN NOTICE OF THE DECISION TO THE PROVIDER. THE DIRECTOR IS REQUIRED TO APPROVE A PROVIDER PROFILE IF THE PROFILE DEMONSTRATES THAT THE PROVIDER WILL IMPLEMENT THE PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION DESCRIBED IN APPENDIX 5K AND THE REQUIRED NUMBER OF ADDITIONAL WATER CONSERVATION MEASURES, AND THAT THE ADDITIONAL WATER CONSERVATION MEASURES ARE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS. IF THE DIRECTOR DOES NOT SEND WRITTEN NOTICE APPROVING OR DISAPPROVING A PROVIDER PROFILE WITHIN 90 DAYS AFTER RECEIVING THE PROFILE, THE PROVIDER PROFILE WILL BE DEEMED APPROVED. IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE, THE PROVIDER MAY APPEAL THE DIRECTOR'S DECISION.

IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE SUBMITTED BY A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT AN INSTITUTIONAL PROVIDER, THE PROVIDER MUST REVISE THE PROVIDER PROFILE TO CORRECT THE DEFICIENCIES AND SUBMIT THE REVISED PROVIDER PROFILE TO THE DIRECTOR WITHIN 90 DAYS AFTER RECEIVING WRITTEN NOTICE OF THE DISAPPROVAL, OR WITHIN 90 DAYS AFTER THE DIRECTOR'S DECISION DISAPPROVING THE PROVIDER PROFILE IS FINAL IF THE DIRECTOR'S DECISION IS APPEALED.

IF THE DIRECTOR DISAPPROVES A PROVIDER PROFILE SUBMITTED BY A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER MAY REVISE THE PROVIDER PROFILE TO CORRECT THE DEFICIENCIES AND SUBMIT THE REVISED PROVIDER PROFILE TO THE DIRECTOR. IF THE PROVIDER DOES NOT SUBMIT A REVISED PROVIDER PROFILE TO THE DIRECTOR, THE PROVIDER WILL NOT BE REGULATED UNDER THE NPCCP, BUT WILL CONTINUE TO BE REGULATED UNDER ITS EXISTING CONSERVATION PROGRAM.

WITHIN 90 DAYS AFTER RECEIVING A REVISED PROVIDER PROFILE, THE DIRECTOR MUST APPROVE OR DISAPPROVE THE PROVIDER PROFILE AND SEND WRITTEN NOTICE OF THE DECISION TO THE PROVIDER. IF THE DIRECTOR DOES NOT SEND WRITTEN NOTICE APPROVING OR DISAPPROVING THE REVISED PROVIDER PROFILE WITHIN THAT TIME PERIOD, THE REVISED PROFILE WILL BE DEEMED APPROVED. IF THE DIRECTOR DISAPPROVES A REVISED PROVIDER PROFILE, THE PROVIDER MAY APPEAL THE DECISION. IF THE PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER IS OUT OF COMPLIANCE WITH ITS CONSERVATION REQUIREMENTS BEGINNING ON THE DATE THE DIRECTOR'S DECISION DISAPPROVING THE REVISED PROVIDER PROFILE IS FINAL UNTIL THE PROVIDER SUBMITS A PROVIDER PROFILE THAT IS APPROVED BY THE DIRECTOR.

A LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT IS NOT REGULATED AS A LARGE UNTREATED WATER PROVIDER OR AN INSTITUTIONAL PROVIDER WILL BE REGULATED UNDER THE NPCCP BEGINNING JANUARY 1, 2010 OR THE DATE ITS PROVIDER PROFILE IS APPROVED BY THE

DIRECTOR, WHICHEVER IS LATER. HOWEVER, THE PROVIDER MAY AGREE TO BE REGULATED UNDER THE NPCCP EARLIER THAN JANUARY 1, 2010 IF THE DIRECTOR APPROVES THE PROVIDER'S PROFILE EARLIER THAN THAT DATE. A LARGE MUNICIPAL PROVIDER THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ELECTS TO BE REGULATED UNDER THE NPCCP WILL BE REGULATED UNDER THE NPCCP IF THE DIRECTOR APPROVES THE PROVIDER'S PROFILE.

5.7.1.2.2 WATER CONSERVATION MEASURES

IN ADDITION TO THE METERING REQUIREMENTS IN SECTION 5-11(6), A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST IMPLEMENT A PUBLIC EDUCATION PROGRAM RELATING TO WATER CONSERVATION AND ONE OR MORE ADDITIONAL WATER CONSERVATION MEASURES THAT MUST BE IMPLEMENTED DEPENDS ON THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM. A PROVIDER WITH 5,000 OR FEWER SERVICE CONNECTIONS MUST IMPLEMENT ONE ADDITIONAL WATER CONSERVATION MEASURE; A PROVIDER WITH 5,001 TO 30,000 SERVICE CONNECTIONS MUST IMPLEMENT FIVE ADDITIONAL WATER CONSERVATION MEASURES; AND A PROVIDER WITH MORE THAN 30,000 SERVICE CONNECTIONS MUST IMPLEMENT TEN ADDITIONAL WATER CONSERVATION MEASURES. THE ADDITIONAL WATER CONSERVATION MEASURE OR MEASURES MUST BE SELECTED FROM THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES IN APPENDIX 5K, OR ANY MODIFICATIONS OF THE LIST. ALL OF THE WATER CONSERVATION MEASURES SELECTED FOR IMPLEMENTATION MUST BE REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

AS STATED IN SECTION 5.7.1.2.1, A PROVIDER MUST IDENTIFY THE ADDITIONAL WATER CONSERVATION MEASURES IT INTENDS TO IMPLEMENT IN ITS PROVIDER PROFILE. ONCE THE PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, THE PROVIDER MUST IMPLEMENT THE WATER CONSERVATION MEASURES DESCRIBED BY THE PROVIDER IN THE APPROVED PROVIDER PROFILE WHILE THE PROVIDER IS REGULATED UNDER THE NPCCP. A PROVIDER MAY DISCONTINUE IMPLEMENTING A WATER CONSERVATION MEASURE IDENTIFIED IN ITS PROVIDER PROFILE, OTHER THAN THE PUBLIC EDUCATION PROGRAM, AND BEGIN IMPLEMENTING A SUBSTITUTE WATER CONSERVATION MEASURE IF BOTH OF THE FOLLOWING CRITERIA ARE MET:

- THE SUBSTITUTE WATER CONSERVATION MEASURE IS ON THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES DESCRIBED IN APPENDIX 5K, OR ANY MODIFICATIONS OF THE LIST.
- THE PROVIDER DETERMINES THAT THE SUBSTITUTE WATER CONSERVATION MEASURE IS REASONABLY RELEVANT TO ITS EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

IF A PROVIDER BEGINS IMPLEMENTING A SUBSTITUTE WATER CONSERVATION MEASURE, THE PROVIDER MAY DISCONTINUE IMPLEMENTING THAT SUBSTITUTE MEASURE AND BEGIN IMPLEMENTING A NEW SUBSTITUTE MEASURE UNDER THE CRITERIA SET FORTH ABOVE. A PROVIDER THAT SUBSTITUTES A WATER CONSERVATION MEASURE MUST NOTIFY THE DIRECTOR OF THE SUBSTITUTION IN ITS NEXT CONSERVATION EFFORTS REPORT (SEE SECTION 5.7.1.2.3 BELOW). IF THE DIRECTOR DETERMINES THAT THE SUBSTITUTE WATER CONSERVATION MEASURE IS NOT REASONABLY RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS, IT WILL NOTIFY THE PROVIDER OF THE

DETERMINATION AND THE PROVIDER MUST RESUME IMPLEMENTING THE DISCONTINUED WATER CONSERVATION MEASURE OR A SUBSTITUTE MEASURE THAT THE DIRECTOR APPROVES. THE DIRECTOR'S DETERMINATION IS AN APPEALABLE AGENCY ACTION.

5.7.1.2.3 CONSERVATION EFFORTS REPORT

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST INCLUDE WITH ITS ANNUAL REPORT FILED BY MARCH 31 OF EACH YEAR A CONSERVATION EFFORTS REPORT THAT INCLUDES THE FOLLOWING INFORMATION FOR THE PREVIOUS CALENDAR YEAR:

- A DESCRIPTION OF THE WATER CONSERVATION MEASURES IMPLEMENTED DURING THE YEAR.
- AN ASSESSMENT OF THE OUTCOMES OF THE IMPLEMENTATION OF EACH MEASURE.
- THE PROVIDER'S PLAN FOR IMPLEMENTATION OF WATER CONSERVATION MEASURES DURING THE CURRENT YEAR.
- IF THE PROVIDER SUBSTITUTED A WATER CONSERVATION MEASURE DURING THE YEAR, A DESCRIPTION OF THE WATER CONSERVATION MEASURE THAT WAS DISCONTINUED, A DESCRIPTION OF THE SUBSTITUTE WATER CONSERVATION MEASURE AND AN EXPLANATION OF HOW THE SUBSTITUTE WATER CONSERVATION MEASURE IS RELEVANT TO THE PROVIDER'S EXISTING SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS.

5.7.1.2.4 WATER RATE STRUCTURE

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST INCLUDE IN ITS ANNUAL REPORT DUE BY MARCH 31 OF EACH YEAR A COPY OF ITS CURRENT WATER RATE STRUCTURE, UNLESS NO CHANGES HAVE BEEN MADE TO THE RATE STRUCTURE SINCE IT WAS LAST SUBMITTED TO THE DIRECTOR.

5.7.1.2.5 RECORDS RETENTION

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST KEEP AND MAINTAIN ACCURATE RECORDS VERIFYING THAT THE PROVIDER IMPLEMENTED THE WATER CONSERVATION MEASURES THAT IT WAS REQUIRED TO IMPLEMENT DURING A YEAR AND RECORDS OF ITS WATER USE DURING THE YEAR. THE RECORDS FOR A YEAR MUST BE KEPT AND MAINTAINED FOR AT LEAST FIVE YEARS AFTER THAT YEAR.

5.7.1.2.6 INDIVIDUAL USER REQUIREMENTS, DISTRIBUTION SYSTEM REQUIREMENTS AND MONITORING AND REPORTING REQUIREMENTS

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST COMPLY WITH THE INDIVIDUAL USER REQUIREMENTS IN SECTION 5-112, THE CONSERVATION REQUIREMENTS FOR MUNICIPAL DISTRIBUTIONS SYSTEMS IN SECTION 5-113 AND THE MONITORING AND REPORTING REQUIREMENTS IN SECTION 5-114.

5.7.1.2.7 REVIEW OF NPCCP

THE LEGISLATION REQUIRING THE DIRECTOR TO MODIFY THE THIRD MANAGEMENT PLAN TO INCLUDE THE NEW NPCCP REQUIRES THE DIRECTOR TO PERIODICALLY REVIEW THE PROGRAM TO EVALUATE ITS EFFECTIVENESS, INCLUDING THE LIST OF WATER CONSERVATION MEASURES APPROVED BY THE DIRECTOR. THE LEGISLATION

AUTHORIZES THE DIRECTOR TO ESTABLISH AN ADVISORY COMMITTEE TO ASSIST THE DIRECTOR IN THE EVALUATION AND TO CONTRACT WITH AN INDEPENDENT RESEARCHER TO ASSIST IN THE EVALUATION. THE LEGISLATION PROVIDES THAT IF THE DIRECTOR DETERMINES THAT CHANGES TO THE PROGRAM ARE APPROPRIATE TO IMPROVE THE EFFECTIVENESS OF THE PROGRAM, THE DIRECTOR SHALL MODIFY THE PROGRAM PURSUANT TO A.R.S. § 45-572 IF THE CHANGES ARE CONSISTENT WITH THE EXISTING STATUTORY PROVISIONS. IF THE CHANGES THAT THE DIRECTOR DETERMINES ARE APPROPRIATE ARE NOT CONSISTENT WITH THE EXISTING STATUTORY PROVISIONS, THE DIRECTOR MUST GIVE WRITTEN NOTICE OF THE APPROPRIATE CHANGES TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES, THE PRESIDENT OF THE SENATE AND THE GOVERNOR. THE DIRECTOR INTENDS TO EVALUATE THE EFFECTIVENESS OF THE NPCCP AS PART OF THE FOURTH MANAGEMENT PLAN DEVELOPMENT PROCESS. THE DEPARTMENT WILL ESTABLISH AN ADVISORY COMMITTEE CONSISTING OF STAKEHOLDERS TO ASSIST IN THE EVALUATION.

5.7.1.3 Alternative Conservation Program

The ACP was developed for the Second Management Plan to give large municipal providers with disproportionately increasing non-residential water use an alternative to the Total GPCD Program. The ACP allows providers experiencing disproportionate increases in non-residential water use the flexibility to remain in compliance while achieving water use efficiency levels comparable to those set by the Total GPCD Program. THE ACP IS AVAILABLE ONLY FOR LARGE MUNICIPAL PROVIDERS THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY. The ACP consists of the following requirements that must be met by the provider: (1) a groundwater use limitation requirement, (2) a residential GPCD requirement, and (3) non-residential requirements.

5.7.1.3.1 Groundwater Use Limitation Requirement

A provider regulated under the ACP must limit its annual groundwater use as follows: ~~(1) If the provider is designated as having an assured water supply, it must limit its annual groundwater use to the amount it can use consistent with the AWS Rules; (2) If the provider is not designated as having an assured water supply, it must limit its annual groundwater use to its largest legal groundwater use during any one year from 1980 through 1989, if it was serving water on or before January 1, 1990, or to 50 percent of the largest legal groundwater use during any one year from January 1, 1990 through 1999, if it began serving water after January 1, 1990 but before January 1, 2000. A provider can achieve compliance with the groundwater use limitation requirement by permanently extinguishing grandfathered rights within the AMA, or by serving groundwater that will be replenished by a replenishment district, remediated groundwater that is accounted for as surface water under section 5-115 of the municipal conservation requirements, groundwater withdrawn outside of an AMA, or renewable supplies.~~

5.7.1.3.2 Residential Gallons Per Capita Day Requirement

[No change]

5.7.1.3.3 Non-Residential Requirements

[No change]

5.7.1.3.4 Compliance with the Alternative Conservation Program

A provider regulated under the ACP is in compliance with the program if it does not exceed its residential GPCD requirement, implements the agreed to non-residential RCMs, and limits its groundwater use to the amount allowed under the AWS Rules, ~~or the amount allowed under the historic limitation, whichever is~~

applicable. The Department will use the written agreement for the ACP to monitor progress with the program. Each year, along with the Annual Water Withdrawal and Use Report, the municipal provider will be required to submit a progress report describing the implementation of each non-residential RCM, the cost of implementing the program, estimated or actual water savings, and a description of any difficulties with the program. Providers regulated under the ACP will also be required to comply with the individual user, distribution system, and monitoring and reporting requirements contained in this chapter.

5.7.1.3.4.2 Residential Gallons Per Capita Day Requirement

5.7.1.4 Institutional Provider Program

For the Second Management Plan, the IPP replaced the special provider category of the First Management Plan. This program will be continued in the Third Management Plan. The IPP allows those providers that have primarily non-residential uses and are unable to economically utilize non-groundwater sources a way to be regulated under a program that focuses on the specific water use characteristics of the service area. The IPP is designed for municipal providers that supply more than 90 percent of their total water deliveries to non-residential water users. Specifically, these non-residential uses include prisons, hospitals, military installations, airports and schools. A large municipal provider may submit a written request to the director for entrance into this program at any time during the third management period. If the request is approved, the provider is assigned specific conservation measures for non-residential uses, a maximum residential GPCD rate, and will also be required to comply with the individual user, distribution system, and monitoring and reporting requirements. The Department will grant institutional provider designation only if the Total GPCD Program is not appropriate and the provider demonstrates that it cannot qualify for the ACP or NPCCP ~~by limiting its groundwater use, extinguishing grandfathered rights, or using renewable sources of water.~~

5.7.2 Conservation Requirements for Large Untreated Water Providers

[No change]

5.7.3 Conservation Requirements for New Large Municipal Providers

A new large provider is defined as a city, town, private water company, or irrigation district that begins serving more than 250 acre-feet of non-irrigation water per year after January 1, 2000. All new large municipal providers THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY will initially be assigned to the Total GPCD Program. Their total GPCD requirement will be calculated consistent with the component methodology used for existing large municipal providers. The Department will determine the base year for the new large municipal provider as the year preceding the year in which the provider began serving greater than 250 acre-feet per year, unless the director determines that water usage during that year is not representative of historic water use. Additionally, the Department will collect residential and non-residential water use data during the base year and the total gallons of water withdrawn, diverted, or received by the provider in the service area. Using an analysis of conservation potential for existing residential users, the Department will calculate a GPCD requirement for existing

residential users. New residential development will be assigned the interior residential model use rates of 57 GPCD for new single family and multifamily water users and the exterior water use model of 149 GPHUD for new single family and 77 GPHUD for new multifamily exterior water use. The actual annual amount of non-residential water use will be included in the GPCD requirement, up to 20 GPCD. The annual amount of lost and unaccounted for water will be included in the component calculation up to 10 percent of the total water use in that year.

Each new large municipal provider THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY will be notified of its total GPCD requirement and will also be given two full years to comply with the requirement. A new large municipal provider DESIGNATED AS HAVING AN ASSURED WATER SUPPLY may apply for the NPCCP or the ACP OR ELECT TO BE REGULATED UNDER THE NPCCP, in accordance with the provisions of these programs, and is also subject to the individual user, distribution system, and monitoring and reporting requirements contained in this chapter.

A new large provider REGULATED UNDER THE TOTAL GPCD PROGRAM may apply for an administrative review requesting a temporary adjustment to its total GPCD requirement in order to serve a turf-related facility. A temporary adjustment will be allowed if the provider demonstrates that direct use effluent or effluent recovered within the area of impact is committed to serve the turf-related facility beginning in four years, but a longer period is necessary for sufficient effluent to be produced to serve the entire facility. The adjustment will remain in effect only until sufficient direct use effluent or effluent recovered within the area of impact is available to serve the entire facility, not to exceed eight years, and may be adjusted as the volume of effluent use increases. The adjustment will be terminated if the infrastructure necessary to deliver the effluent is not in place at the beginning of the fourth year after the provider commences service to the facility. A permanent adjustment will not be granted to a new large municipal provider. If a new large municipal provider THAT IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY cannot serve a turf-related facility under its existing per capita requirement and direct use effluent or effluent recovered within the area of impact will not be physically available to serve the facility within a reasonable period of time, the provider may enroll in the Non-Per Capita Conservation Program or the Alternative Conservation Program, if it wishes to serve the facility.

A NEW LARGE MUNICIPAL PROVIDER THAT IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY WILL BE REGULATED UNDER THE NPCCP DESCRIBED IN SECTION 5-104. THE PROVIDER MUST SUBMIT A PROVIDER PROFILE CONTAINING THE INFORMATION DESCRIBED IN SECTION 5-104(B)(1) BY JULY 1, 2009 OR WITHIN SIX MONTHS AFTER RECEIVING WRITTEN NOTICE OF ITS CONSERVATION REQUIREMENTS FROM THE DIRECTOR, WHICHEVER IS LATER. THE PROVIDER MUST BEGIN COMPLYING WITH THE NPCCP UPON APPROVAL OF THE PROVIDER'S PROVIDER PROFILE PURSUANT TO SECTION 5-104(B)(2) OR (B)(3).

5.7.4 Conservation Requirements for Consolidated Municipal Providers and Providers that Acquire or Convey a Portion of a Service Area

~~If two or more municipal providers consolidate their service areas or if a large municipal provider acquires a portion of another provider's service area, the consolidated provider, acquiring provider, or conveying provider will receive a recalculated or revised conservation requirement. A consolidated provider that qualifies as a large municipal provider will be assigned to the Total GPCD Program and its GPCD components will be calculated by prorating the respective per capita component targets, populations and water use as appropriate. A consolidated provider may apply for the NPCCP or the ACP. If one of the consolidated providers was regulated under one of these programs prior to the consolidation, the consolidated provider's application for the program must include only the information that has changed since the time that the provider originally filed the application for the program. Providers that acquire or convey a portion of a service area will continue to be regulated under the conservation program that they were under prior to the acquisition or conveyance. However, if they were regulated under either the~~

~~NPCP or the ACP, they must reapply for regulation under that program within 180 days after the acquisition or conveyance and must submit only the information that has changed since the original application was filed.~~

IF TWO OR MORE MUNICIPAL PROVIDERS CONSOLIDATE THEIR SERVICE AREAS OR IF A LARGE MUNICIPAL PROVIDER ACQUIRES A PORTION OF ANOTHER PROVIDER'S SERVICE AREA, THE CONSOLIDATED PROVIDER, ACQUIRING PROVIDER, OR CONVEYING PROVIDER WILL RECEIVE A RECALCULATED OR REVISED CONSERVATION REQUIREMENT. A CONSOLIDATED PROVIDER THAT QUALIFIES AS A LARGE MUNICIPAL PROVIDER WILL BE REGULATED AS FOLLOWS:

- IF THE CONSOLIDATED PROVIDER IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, IT WILL BE ASSIGNED TO THE TOTAL GPCD PROGRAM AND ITS GPCD COMPONENTS WILL BE CALCULATED BY PRORATING THE RESPECTIVE PER CAPITA COMPONENT TARGETS, POPULATIONS, AND WATER USE AS APPROPRIATE. THE CONSOLIDATED PROVIDER MAY APPLY FOR THE ACP OR MAY ELECT TO BE REGULATED UNDER THE NPCCP.
- IF THE CONSOLIDATED PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY, THE PROVIDER MUST SUBMIT TO THE DIRECTOR A PROVIDER PROFILE AS DESCRIBED IN SECTION 5-104(B)(1) WITHIN 60 DAYS AFTER THE CONSOLIDATION BECOMES EFFECTIVE OR JULY 1, 2009, WHICHEVER IS LATER. THE CONSOLIDATED PROVIDER WILL BE REGULATED UNDER THE NPCCP DESCRIBED IN SECTION 5-104 UPON APPROVAL OF THE PROVIDER PROFILE BY THE DIRECTOR.

PROVIDERS THAT ACQUIRE OR CONVEY A PORTION OF A SERVICE AREA CONTINUE TO BE REGULATED UNDER THE CONSERVATION PROGRAM THEY WERE UNDER PRIOR TO THE ACQUISITION OR CONVEYANCE. HOWEVER, IF THE CONVEYING OR ACQUIRING PROVIDER IS DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND WAS REGULATED UNDER THE ACP, IT MUST REAPPLY FOR REGULATION UNDER THAT PROGRAM WITHIN 180 DAYS AFTER THE ACQUISITION OR CONVEYANCE AND MUST SUBMIT ONLY THE INFORMATION THAT HAS CHANGED SINCE THE ORIGINAL APPLICATION WAS FILED. ALSO, IF THE CONVEYANCE OCCURS ON OR AFTER JANUARY 1, 2010 AND THE CONVEYING OR ACQUIRING PROVIDER IS NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AFTER THE CONVEYANCE OR ACQUISITION, IT WILL BE REGULATED UNDER THE NPCCP REGARDLESS OF WHETHER IT WAS REGULATED UNDER THAT PROGRAM PRIOR TO THE CONVEYANCE OR ACQUISITION. IF THE CONVEYING OR ACQUIRING PROVIDER IS REGULATED UNDER THE NPCCP AFTER THE CONVEYANCE OR ACQUISITION AND IT WAS REGULATED UNDER THAT PROGRAM IMMEDIATELY PRIOR TO THE CONVEYANCE OR ACQUISITION, THE PROVIDER MUST SUBMIT A NEW PROVIDER PROFILE TO THE DIRECTOR IF EITHER: (1) THE CONVEYANCE OR ACQUISITION RESULTED IN THE TOTAL NUMBER OF SERVICE AREA CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM INCREASING OR DECREASING TO A NEW TIER LEVEL; OR (2) THE DIRECTOR DETERMINES THAT THE PROVIDER'S SERVICE AREA CHARACTERISTICS OR WATER USE PATTERNS HAVE CHANGED.

[No change]

5.7.6.1 Individual User Requirements

5.7.6.2 Distribution System Requirements

5.7.6.3 Monitoring and Reporting Requirements

All municipal providers are required to annually: (1) report to the Department information on the total quantity of water used within the service area and the total volume of water delivered for various municipal purposes, (2) calculate the volume of lost and unaccounted for water within the service area, and (3) report the total number of housing units, by unit type, added to the service area from July 1 of the previous calendar year to July 1 of the reporting year.

Large municipal providers are required to separately measure and report the amount of water delivered each month for: irrigation uses; residential uses, separated by single family and multifamily; and non-residential uses, separated by water use categories, including turf-related facility use, commercial use, industrial use, government use, construction use, surface water treatment, and other uses.

All municipal providers are required to submit to the Department, on an annual basis, an updated service area and distribution system map delineating all potable and non-potable distribution lines greater than 4 inches, all potable treatment facilities, all well sites, and all non-potable treatment.

Large municipal providers regulated under the NPCCP or the ACP are required to submit a progress report that includes an evaluation of the reasonable conservation measures in accordance with their written stipulated agreement. A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NPCCP MUST SUBMIT A CONSERVATION EFFORTS REPORT AS DESCRIBED IN SECTION 5-104(E) AND MUST REPORT THE TOTAL NUMBER OF SERVICE CONNECTIONS TO THE PROVIDER'S WATER DISTRIBUTION SYSTEM AS OF THE END OF THE REPORTING YEAR.

5.10 SUMMARY AND CONCLUSIONS

The Municipal Conservation Program for the Third Management Plan is similar to that of the Second Management Plan, consisting of the Total GPCD Program, the ACP, and the NPCCP for large municipal providers serving water for domestic uses.

The Total GPCD Program has been amended to allow for annual recalculation of the total GPCD components, with conservation reductions ranging from zero to 7 percent applied to residential GPCD rates. Non-residential GPCD rates will be capped at baseline levels for each provider, while lost and unaccounted for water cannot exceed 10 percent. A flexibility account allows a provider to accumulate credits during years in which their water use rate is below the maximum allowable level, and to use

existing credits during a year in which they exceed their allowable use level. This enables a provider to remain in compliance during years of abnormal weather conditions or unusual water use.

UNLIKE THE SMP, THE ACP IN THE THIRD MANAGEMENT PLAN IS AVAILABLE ONLY FOR LARGE MUNICIPAL PROVIDERS THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY. The ACP, like the Total GPCD Program, calls for reductions in the residential GPCD rate, includes a flexibility account, but does not hold providers regulated under this program to non-residential use requirements. Instead providers must implement a series of RCMs. Groundwater use is capped at the highest legal annual use level of use between 1980 and 1989 for providers serving water on or before January 1, 1990. Providers that began serving water after January 1, 1990 but before January 1, 2000 are limited to 50 percent of highest legal annual use rate during the period from January 1, 1990 through 1999 ANNUAL VOLUME OF GROUNDWATER ALLOWED UNDER THE DEPARTMENT'S ASSURED WATER SUPPLY RULES. The ACP allows providers with a growing non-residential use component an alternative to the Total GPCD Program that will allow them to remain in compliance, and the use of a groundwater cap is consistent with the Department's philosophy of encouraging the use of renewable supplies.

~~The NPCCP also affords municipal providers an alternative to the Total GPCD Program. The NPCCP is not based on GPCD requirements, but instead utilizes specific RCMs that are designed to achieve water conservation savings equivalent to those of the Total GPCD Program. The NPCCP requires that providers either gradually reduce their groundwater use, using no groundwater by 2010, or obtain a Designation of AWS.~~

AS A RESULT OF LEGISLATION ENACTED IN 2007, THE NPCCP HAS BEEN MODIFIED IN SEVERAL RESPECTS. AS REQUIRED BY THE LEGISLATION, ALL LARGE MUNICIPAL PROVIDERS THAT ARE NOT DESIGNATED AS HAVING AN ASSURED WATER SUPPLY AND THAT ARE NOT REGULATED AS LARGE UNTREATED WATER PROVIDERS OR INSTITUTIONAL PROVIDERS WILL BE REGULATED UNDER THE NPCCP BEGINNING JANUARY 1, 2010 OR THE DATE THEIR PROVIDER PROFILE IS APPROVED BY THE DIRECTOR, WHICHEVER IS LATER. LARGE MUNICIPAL PROVIDERS THAT HAVE BEEN DESIGNATED AS HAVING AN ASSURED WATER SUPPLY ARE NOT REQUIRED TO BE REGULATED UNDER THE NPCCP, BUT THEY MAY ELECT TO BE REGULATED UNDER THAT PROGRAM AS AN ALTERNATIVE TO THE TOTAL GPCD PROGRAM. PROVIDERS REGULATED UNDER THE NEW NPCCP MUST IMPLEMENT A REQUIRED NUMBER OF WATER CONSERVATION MEASURES WITHIN THEIR SERVICE AREA. THE REQUIREMENT TO LIMIT GROUNDWATER USE TO A SPECIFIED VOLUME HAS BEEN ELIMINATED.

Other programs, including the Large Untreated Provider Program, the IPP, and the Small Provider Program, are also included in the Third Management Plan. These programs are substantially unchanged from their Second Management Plan formats.

5.11 FUTURE DIRECTIONS

Throughout the third management period, data collection will improve and additional analyses of municipal growth patterns will be performed. The Department will continue to collect information regarding the best available technologies for residential and non-residential water use. The Department will attempt to quantify a reasonable goal for future reductions in municipal water use.

~~The Department will continue to explore the possibility of developing a separate private water company program during the third management period.~~ Through discussions with the ACC, the Department will work in the development of ACC policies related to water conservation and supply acquisition, and attempt to foster an understanding with the ACC regarding the ability of private water companies to develop

alternatives and be given more assurances about passing through to customers those costs associated with compliance with the Department's programs.

5-102. Large Municipal Providers - Conservation Programs

- A. Beginning with the calendar year determined under section 5-103 subsection A, paragraph 2, and continuing until the first compliance date for any substitute requirement in the Fourth Management Plan, a large municipal provider DESIGNATED AS HAVING AN ASSURED WATER SUPPLY shall be regulated under the Total Gallons Per Capita Per Day (GPCD) Program described in section 5-103, unless the provider ~~has applied for and been accepted for regulation under~~ ELECTS TO BE REGULATED UNDER the Non-Per Capita Conservation Program described in section 5-104 OR APPLIES FOR AND IS ACCEPTED FOR REGULATION UNDER the Alternative Conservation Program described in section 5-105 ~~or is designated as an institutional provider under section 5-108.~~

If a large municipal provider DESIGNATED AS HAVING AN ASSURED WATER SUPPLY is accepted into the Non-Per Capita Conservation Program, the Alternative Conservation Program, or is designated as an institutional provider, the provider shall continue to comply with its total GPCD requirement until the first compliance date assigned by the director for the provider under the Alternative Conservation Program, the Non-Per Capita Conservation Program, or as an Institutional provider. [No change]

5-104. Non-Per Capita Conservation Program

~~A. Eligibility for the Non-Per Capita Conservation Program~~

~~*A large municipal provider may apply for the Non-Per Capita Conservation Program if any of the following applies:*~~

- ~~1. The provider is a member of a groundwater replenishment district established under Title 48, Chapter 27, Arizona Revised Statutes.~~
- ~~2. The service area of the provider has qualified as a member service area under Title 48, Chapter 22, Arizona Revised Statutes, or as a water district member under Title 48, Chapter 28, Arizona Revised Statutes, and the conditions established under A.R.S. § 45-576.01(B)(2) and (3) are met by the conservation district or the water district, as applicable, for the AMA in which the service area is located.~~
- ~~3. The provider has developed a plan to both:

 - ~~a. Reduce the proportion of mined groundwater supplied by it for use within its service area such that the result computed by dividing the volume of mined groundwater supplied by the provider for use within its service area in a year by the volume of all water supplied by the provider for use within its service area in that year does not exceed:

 - ~~1) Two thirds for 2000.~~
 - ~~2) Three fifths for 2001.~~
 - ~~3) Eight fifteenths for 2002.~~
 - ~~4) Seven fifteenths for 2003.~~
 - ~~5) Two fifths for 2004.~~
 - ~~6) One third for 2005.~~
 - ~~7) Four fifteenths for 2006.~~
 - ~~8) One fifth for 2007.~~
 - ~~9) Two fifteenths for 2008.~~
 - ~~10) One fifteenth for 2009.~~~~
 - ~~b. Deliver no mined groundwater for use within its service area after January 1, 2010.~~~~
- ~~4. The provider is designated as having an assured water supply under rules adopted by the director pursuant to A.R.S. § 45-576.~~

~~B. Application for Non-Per Capita Conservation Program~~

~~A large municipal provider's application for the Non-Per Capita Conservation Program must be approved by the provider's governing body, and must include the following:~~

- ~~1. A description and evaluation, including implementation dates, of the provider's existing conservation programs.~~
- ~~2. A description of conservation programs the provider intends to implement if approved for the Non-Per Capita Conservation Program, including a time schedule for implementing the programs.~~
- ~~3. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 3, a water supply plan demonstrating that the provider will reduce the proportion of mined groundwater supplied by it within its service area to the proportions described in that subparagraph, and that it will deliver no mined groundwater after January 1, 2010.~~
- ~~4. If the provider intends to comply with subsection D of this section by implementing one or more substitute RCMs in lieu of a standard RCM, or if the provider requests the director~~

~~to modify a level of conservation potential for the provider's service area pursuant to subsection D, paragraph 1, subparagraph a of this section, an analysis of water use within the provider's service area that includes all of the following:~~

- ~~a. If the provider intends to implement one or more substitute RCMs, from either the same water use category or a system related substitute RCM, information demonstrating that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs. If the provider intends to implement one or more substitute RCMs that are not from the same water use category or system related substituted RCMs, information demonstrating that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs.~~
 - ~~b. The amount of water used each month during the past three years by each of the following water use sectors, as applicable: (1) residential (disaggregated by single family and multifamily), (2) commercial, (3) industrial, (4) turf related facilities, (5) government, (6) construction, (7) distribution system losses, and (8) any other uses. The provider is not required to include this information if it has already been reported to the Department.~~
 - ~~c. An identification and evaluation of the water use sectors described in item b) of this subparagraph that have the highest water conservation potential.~~
- ~~5. If the provider is requesting an individual incidental recharge factor under subsection C, paragraph 2 of this section:~~
- ~~a. A copy of a hydrological study that demonstrates the amount of water withdrawn, diverted or received for delivery by the provider for use within its service area during each of the preceding five years and the amount of incidental recharge that was attributable to the provider during those years. The study shall be prepared consistent with the methodology contained in Appendix 5G.~~
 - ~~b. A copy of a hydrological study projecting the average annual amount of water that will be withdrawn, diverted or received for delivery by the provider for use within its service area during the management period and the average annual amount of incidental recharge that will be attributable to the provider during the management period.~~
- ~~6. Any other information required by the director.~~

~~C. Incidental Recharge Factor~~

~~1. Standard Incidental Recharge Factor~~

~~The standard incidental recharge factor for the Pinal AMA for the third management period is 0 percent. The standard incidental recharge factor shall be used to calculate the amount of mined groundwater supplied during a year by a large municipal provider that applied for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, unless the provider applies for and is granted an individual incidental recharge factor pursuant to paragraph 2 of this subsection.~~

~~2.—Individual Incidental Recharge Factor~~

~~A large municipal provider that applies for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section may request an incidental recharge factor that is different than the standard incidental recharge factor set forth in paragraph 1 of this subsection by submitting the information described in subsection B, paragraph 5 of this section with its application. The director shall establish a different incidental recharge factor for the provider, as described in Appendix 5G, if the information submitted by the provider demonstrates that the ratio of the average annual amount of incidental recharge expected to occur within the provider's service area during the third management period to the average annual amount of water expected to be supplied by the provider for use within its service area during the third management period is different than the standard incidental recharge factor. If the director establishes an individual incidental recharge factor for the provider under this paragraph, the individual incidental recharge factor shall be used to calculate the amount of mined groundwater supplied by the provider during a year.~~

D.—Criteria for Approval of Application

~~A large municipal provider that applies for the Non-Per Capita Conservation Program shall be approved for the program only if all of the following conditions are satisfied, as applicable:~~

- ~~1.—The provider agrees in writing to implement RCMs that the director determines will, if properly implemented, result in the achievement of a water use efficiency within the provider's service area equivalent to the water use efficiency assumed in the provider's total GPCD requirements for the third management period. To comply with this requirement, the provider must agree in writing to implement the following RCMs for the following water use categories and programs beginning on a date agreed upon by the director and the provider:~~

~~a.—Residential Water Use~~

- ~~1) Residential interior water use category—The provider shall agree in writing to implement the residential interior standard RCMs described in Appendix 5F.1. In lieu of implementing one or both of the standard RCMs, the provider may agree to implement: A) one or more of the residential interior substitute RCMs or system-related substitute RCMs listed in the substitute RCM list described in Appendix 5F.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not residential interior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard residential interior water use RCMs if the substitution would result in the provider implementing no RCMs in the residential interior water use category.~~
- ~~2) Residential exterior water use category—The provider shall agree in writing to implement the residential exterior standard RCMs described in Appendix 5F.1. In lieu of implementing one or more of the standard RCMs, the provider may~~

~~agree to implement: A) one or more of the residential exterior substitute RCMs or system-related substitute RCMs listed in the substitute RCM list described in Appendix 5F.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM; or B) one or more substitute RCMs that are not residential exterior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard residential exterior water use RCMs if the substitution would result in the provider implementing no RCMs in the residential exterior water use category.~~

- ~~3) Implementation level—The provider shall agree to implement residential interior or exterior RCMs for existing residential customers at the implementation level (minimum, moderate or maximum) that corresponds to the level of conservation potential that the director determined existed for interior and exterior water use by existing residential users within the provider's service area when the director established the provider's total GPCD requirements for the third management period, as shown in Table 5-104.D.~~

~~The director may modify a level of conservation potential shown for a provider in Table 5-104.D if the provider requests a modification in an application for administrative review pursuant to A.R.S. § 45-575(A) or in the provider's application for regulation under the Non-Per Capita Conservation Program, and the provider demonstrates that the level of conservation potential shown in Table 5-104.D is not accurate for the provider's service area. A provider requesting a modification of a level of conservation potential shall submit to the director a water use analysis containing the information described in subsection B, paragraph 4, of this section. If the level of conservation potential for interior or exterior water use by existing residential users as shown in Table 5-104.D, or as modified by the director, is "no reduction," the provider is not required to implement any RCMs for existing residential customers in that water use category.~~

~~b. Non-Residential Water Use~~

- ~~1) Non-residential interior water use category—The provider shall agree in writing to implement the non-residential interior standard RCMs described in Appendix 5F.2. In lieu of implementing one or more of the standard RCMs, the provider may agree to implement: A) one or more of the non-residential interior substitute RCMs or system-related RCMs listed in the substitute RCM list described in Appendix 5F.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not non-residential interior substitute RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water use efficiency within the provider's service area that is greater than the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard non-residential interior~~

~~water use RCMs if the substitution would result in the provider implementing no RCMs in the non-residential interior water use category.~~

~~2) *Non-residential exterior water use category*—The provider shall agree in writing to implement the non-residential exterior standard RCMs described in Appendix 5F.2. In lieu of implementing one or both of the standard RCMs, the provider may agree to implement: A) one or more of the non-residential exterior substitute RCMs or system-related RCMs listed in the substitute RCM list described in Appendix 5F.4 if the director determines that the substitute RCM or RCMs will be designed to achieve a water-use efficiency within the provider's service area equivalent to the efficiency that would result from implementation of the standard RCM or RCMs; or B) one or more substitute RCMs that are not non-residential exterior water use RCMs or system-related substitute RCMs if the director determines that the substitute RCM or RCMs will be designed to achieve a water-use efficiency within the provider's service area that is greater than equivalent to the efficiency that would result from the implementation of the standard RCM or RCMs. The director shall not approve a substitution of the standard non-residential exterior water use RCMs if the substitution would result in the provider implementing no RCMs in the non-residential exterior water use category.~~

~~c. *Public Education Program*~~

~~The provider shall agree in writing to implement the education standard RCM described in Appendix 5F.3. In lieu of implementing the standard RCM, the provider may agree to implement one or more of the education substitute RCMs listed in the substitute RCM list described in Appendix 5F.4. The substituted RCM or RCMs must not duplicate other RCMs that the provider will implement as part of the Non-Per Capita Conservation Program.~~

- ~~2. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 1 of this section, the provider will be accepted into the program only if the conditions established in A.R.S. § 45-576.01(A)(2) and (3) are met by the groundwater replenishment district of which the provider is a member.~~
- ~~3. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 2 of this section, the provider will be accepted into the program only if the conditions established in A.R.S. § 45-576.01(B)(2) and (3) are met for the AMA by the multi-county water conservation district or AMA water district of which the provider is a member.~~

- ~~4. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, the provider will be accepted into the program only if the director has determined that the provider will reduce the proportion of mined groundwater supplied within its service area to the proportions described in that subparagraph.~~
- ~~5. If the provider is applying for the Non-Per Capita Conservation Program under subsection A, paragraph 4 of this section, the provider will be accepted into the program only if the director determines that the provider is designated as having an assured water supply under the rules adopted by the director under A.R.S. § 45-576.~~

~~E. Non-Per Capita Conservation Program Requirements~~

~~A large municipal provider regulated under the Non-Per Capita Conservation Program shall comply with the following requirements, as applicable, until the effective date of any substitute conservation requirements established in the Fourth Management Plan:~~

- ~~1. The provider shall implement the RCMs agreed to in writing under subsection D, paragraph 1 of this section beginning on a date agreed upon by the director and the provider.~~
- ~~2. If the provider applied for the Non-Per Capita Conservation Program under subsection A, paragraph 3 of this section, the provider shall reduce the proportion of mined groundwater supplied within its service area to the proportions described in that paragraph. A provider's failure to comply with this requirement during any year will be excused if the provider demonstrates to the director's satisfaction that the failure was due to drought conditions or the failure of a surface water distribution system.~~
- ~~3. If the provider applied for the Non-Per Capita Conservation Program under subsection A, paragraph 4 of this section, the provider shall not supply groundwater for use within its service area in an amount that exceeds the amount of groundwater that the provider may supply for use within its service area consistent with the rules adopted by the director pursuant to A.R.S. § 45-576. If the provider's designation of assured water supply is revoked or otherwise terminates after the provider is accepted into the program, the amount of groundwater the provider may supply for use within its service area consistent with the rules shall be determined by the director as the amount of groundwater the provider would have been allowed to supply under the rules if the provider's designation of assured water supply had not been revoked or terminated.~~

C. Alternative Conservation Program Requirements

1. Groundwater Use Limitation Requirement

- ~~a. Beginning with a calendar year agreed upon by the director and a large municipal provider regulated under the Alternative Conservation Program, and for each calendar year thereafter until the first compliance date for any substitute requirement in the Fourth Management Plan, the provider shall limit its annual use of groundwater withdrawn from within the AMA to the following, as applicable:~~

~~1) If the provider is designated as having an assured water supply under the rules adopted by the director pursuant to A.R.S. § 45-576, the amount of groundwater which the provider may use consistent with the rules ADOPTED BY THE DIRECTOR PURSUANT TO A.R.S. § 45-576, including any amount of groundwater that will be replenished by a conservation district pursuant to Title 48, Chapter 22, Arizona Revised Statutes.~~

~~2) If the provider is not designated as having an assured water supply under the rules adopted by the director pursuant to A.R.S. § 45-576, one of the following, as applicable:~~

~~a) If the provider was serving water as a large municipal provider on or before January 1, 1990, the provider's largest legal groundwater use during any one calendar year from calendar year 1980 through calendar year 1989.~~

~~b) If the provider began serving water as a large municipal provider after January 1, 1990 but before January 1, 2000, 50 percent of the provider's largest legal groundwater use during any one calendar year from January 1, 1990 through calendar year 1999~~

~~b. The large municipal provider may achieve compliance with the groundwater use limitation requirement described in subparagraph a, item 2 of this paragraph by permanently extinguishing or causing to be permanently extinguished grandfathered rights to groundwater as described in subparagraph c of this paragraph, by serving groundwater that will be replenished by a conservation district pursuant to Title 48, Chapter 22, Arizona Revised Statutes, by using remediated groundwater that is~~

~~consistent with the accounting for surface water as provided in section 5-115, or by substituting non-groundwater supplies or groundwater withdrawn from outside the AMA for groundwater withdrawn from within AMA, or by a combination of these methods.~~

~~c. Extinguishment of Groundwater Uses Associated with Grandfathered Rights~~

~~1) Applicability~~

~~Only irrigation grandfathered rights, Type 1 non-irrigation grandfathered rights and Type 2 non-irrigation grandfathered rights, as described in A.R.S. §§ 45-462 through 45-465, may be extinguished to meet the groundwater use limitation requirement. The large municipal provider shall not receive credit toward the achievement of the groundwater use limitation requirement for the extinguishment of either a Type 2 non-irrigation grandfathered right used for electrical energy generation or mineral extraction or processing purposes, or a Type 1 or Type 2 non-irrigation grandfathered right owned or previously owned by a municipal provider and used or previously used to serve the municipal provider's service area.~~

~~2) Annual Credits~~

~~The director shall determine the amount of annual credit a large municipal provider obtains for extinguishment of grandfathered rights to groundwater as follows:~~

- ~~a) For each irrigation grandfathered right extinguished or caused to be extinguished by the provider, the annual credit shall be the amount calculated by multiplying 1.5 acre feet per acre by the number of water duty acres associated with the extinguishment, less any debits, in acre feet, in the farm's operating flexibility account at the time the right is extinguished.~~
- ~~b) For each Type 1 non-irrigation grandfathered right or portion of such right extinguished or caused to be extinguished by the provider, the annual credit shall be the amount calculated by multiplying 1.5 acre feet per acre by the number of acres to which the Type 1 non-irrigation grandfathered right is appurtenant, or a proportional amount thereof if only a portion of the right is extinguished.~~
- ~~c) For each Type 2 non-irrigation grandfathered right extinguished or caused to be extinguished by the provider, the annual credit shall be the full amount, in acre feet, of the certificated Type 2 non-irrigation grandfathered right.~~

~~3) Proof of Extinguishment~~

~~In order for a large municipal provider to obtain an annual credit for extinguishing or causing to be extinguished a grandfathered right to groundwater, the holder of the grandfathered right must deliver the Certificate of Grandfathered Right to the director before the calendar year in which the credit will be used, request that the grandfathered right be extinguished, and direct that the provider receive the annual credit. Only one provider may receive annual credit for any one portion of a grandfathered right which has been extinguished.~~

d. Compliance

The director shall determine whether a large municipal provider is in compliance with its groundwater use limitation requirement, as described in subparagraph a, item 2) of this paragraph in a calendar year as follows:

- 1) Add together the amount of annual credits received by the provider for extinguishing grandfathered rights to groundwater after January 1, 1990 pursuant to subparagraph c of this paragraph and pursuant to the Alternative Conservation Program in the second management plan.*
- 2) Calculate the total volume of groundwater, in acre feet, which the provider withdrew, diverted or received during the calendar year for use within the provider's service area. In making this calculation, the director shall not include any groundwater that a conservation district replenished or is obligated to replenish under Title 48, Chapter 22, Arizona Revised Statutes or any remediated groundwater qualifying under section 5-115.*
- 3) Subtract the amount calculated in item 1) above from the volume calculated in item 2) above.*
- 4) A provider is in compliance with its groundwater use limitation requirement if the amount calculated in item 3) of this subparagraph is equal to or less than the following, as applicable:*
 - a) If the provider was serving water as a large municipal provider on or before January 1, 1990, the provider's largest legal groundwater use during any one calendar year from calendar year 1980 through calendar year 1989.*
 - b) If the provider began serving water as a large municipal provider after January 1, 1990 but before January 1, 2000, 50 percent of the provider's largest legal groundwater use during any one calendar year from January 1, 1989 through calendar year 1999.*

I. PUBLIC EDUCATION PROGRAM

A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM DESCRIBED IN SECTION 5-104 SHALL IMPLEMENT A PUBLIC EDUCATION PROGRAM THAT INCLUDES THE FOLLOWING COMPONENTS:

1. AT LEAST TWICE A YEAR, THE PROVIDER SHALL COMMUNICATE TO CUSTOMERS THE IMPORTANCE OF WATER CONSERVATION AND INFORM THEM OF THE KIND OF INFORMATION THAT IS AVAILABLE TO THEM FROM THE PROVIDER REGARDING WATER CONSERVATION HOW THEY CAN OBTAIN THE INFORMATION. COMMUNICATION CHANNELS SHALL INCLUDE ONE OR MORE OF THE FOLLOWING: WATER BILL INSERTS, MESSAGES ON WATER BILLS, PROVIDER WEB PAGE, POST CARDS, NEWSLETTERS OR PRINT PIECES. PROVIDING INFORMATION ON WEBSITES CONTAINING WATER CONSERVATION INFORMATION IS ENCOURAGED IF THE PROVIDER HAS NO WEB SITE OR HAS NO WATER CONSERVATION INFORMATION ON THEIR WEB SITE.
2. THE PROVIDER SHALL PROVIDE CUSTOMERS WITH FREE WRITTEN INFORMATION ON WATER CONSERVATION (I.E., PAMPHLETS, BROCHURES). THE INFORMATION SHALL BE AVAILABLE IN THE PROVIDER'S OFFICE AND THE PROVIDER SHALL SEND INFORMATION TO CUSTOMERS ON REQUEST. THE PROVIDER IS ENCOURAGED TO DISTRIBUTE WATER CONSERVATION INFORMATION AT OTHER LOCATIONS AS WELL.

II. ADDITIONAL WATER CONSERVATION MEASURES

THE FOLLOWING IS A LIST OF ADDITIONAL WATER CONSERVATION MEASURES THAT A LARGE MUNICIPAL PROVIDER REGULATED UNDER THE NON-PER CAPITA CONSERVATION PROGRAM DESCRIBED IN SECTION 5-104 MUST SELECT FROM TO COMPLY WITH THE PROGRAM. THE DIRECTOR MAY MODIFY THE LIST TO INCLUDE ADDITIONAL WATER CONSERVATION MEASURES PURSUANT TO THE PROCEDURE SET FORTH AT THE END OF THIS APPENDIX. A COPY OF THE MOST RECENT THE LIST OF ADDITIONAL WATER CONSERVATION MEASURES SHALL BE POSTED ON THE DEPARTMENT'S WEB SITE AND SHALL BE ON FILE IN THE PINAL ACTIVE MANAGEMENT AREA OFFICE.

CATEGORY 1: PUBLIC AWARENESS/PUBLIC RELATIONS

PROGRAMS IN THIS CATEGORY ARE DESIGNED TO PROVIDE WATER USERS INFORMATION ON THE NEED FOR AND IMPORTANCE OF WATER CONSERVATION, AS WELL AS INFORMATION ON THE CONSERVATION SERVICES AVAILABLE TO THEM. THE FOLLOWING PROGRAMS QUALIFY IN THIS CATEGORY:

LOCAL AND/OR REGIONAL MESSAGING PROGRAM

WATER PROVIDER ACTIVELY PARTICIPATES IN WATER CONSERVATION CAMPAIGN WITH LOCAL OR REGIONAL ADVERTISING. THE CAMPAIGN MUST PROMOTE WAYS FOR CITIZENS TO SAVE WATER. METHODS TO PROMOTE A CAMPAIGN MAY INCLUDE MEDIA SUCH AS TELEVISION AND RADIO COMMERCIALS, WEB SITES, AND UTILIZATION OF PROMOTIONAL MATERIALS SUCH AS BROCHURES (SPANISH AND ENGLISH), VEHICLE SIGNS (BUSSES, GARBAGE TRUCKS, ETC.), BOOKMARKS, AND MAGNETS, ETC.

SPECIAL EVENTS/PROGRAMS AND COMMUNITY PRESENTATIONS

AN EDUCATIONAL OR PROMOTIONAL EVENT WHERE CONSERVATION INFORMATION IS DISPLAYED AND AVAILABLE AND/OR PRESENTATIONS ARE GIVEN. EVENTS MAY INCLUDE HOME AND GARDEN SHOWS, ART SHOWS, COMMUNITY CELEBRATIONS, ENVIRONMENTAL SHOWS, ETC. TO RECEIVE FULL CREDIT FOR THIS MEASURE, A PROVIDER MUST ATTEND AND STAFF AT LEAST THREE EVENTS PER YEAR.

MARKET SURVEYS TO IDENTIFY INFORMATION NEEDS/ASSESS SUCCESS OF MESSAGES

WATER PROVIDER SURVEYS CUSTOMERS TO GATHER INFORMATION REGARDING INFORMATION NEEDS, PROGRAM PREFERENCES AND/OR RESPONSE TO CONSERVATION MESSAGES. PRIOR TO SURVEY DESIGN, THE PROVIDER MUST SET OBJECTIVES FOR THE SURVEY AND IDENTIFY SYSTEMATIC METHODS FOR DATA COLLECTION AND ANALYSIS, AS WELL AS FOR COMMUNICATION OF RESULTS. SURVEY RESULTS ARE USED TO IMPROVE CURRENT WATER CONSERVATION ACTIVITIES AND/OR TO PLAN FUTURE ACTIVITIES. THIS MEASURE WILL BE EFFECTIVE FOR ONLY ONE YEAR. IN SUBSEQUENT YEARS, THE PROVIDER MUST REPLACE THIS MEASURE WITH ANOTHER WATER CONSERVATION MEASURE FROM CATEGORIES 1 THROUGH 7 OF THIS SECTION THAT IS APPROPRIATE FOR THE PROVIDER'S SERVICE AREA AS REFLECTED IN THE PROVIDER'S APPROVED PROVIDER PROFILE.

CATEGORY 2: CONSERVATION EDUCATION AND TRAINING

PROGRAMS IN THIS CATEGORY ARE DESIGNED TO ASSIST USERS IN BETTER UNDERSTANDING HOW TO CONSERVE WATER BY PROVIDING WRITTEN INFORMATION AND/OR TRAINING IN WATER CONSERVATION TOOLS AND TECHNIQUES. THE FOLLOWING PROGRAMS QUALIFY UNDER THIS CATEGORY:

ADULT EDUCATION AND TRAINING PROGRAMS

THE WATER PROVIDER IMPLEMENTS AN ADULT EDUCATION AND/OR TRAINING PROGRAM. THE PROGRAM MUST INCLUDE A COMBINATION OF EFFORTS TO PROVIDE ADULTS WITHIN THE PROVIDER'S SERVICE AREA WITH HANDS-ON INFORMATION. THIS MAY INCLUDE, BUT IS NOT LIMITED TO, REGULARLY SCHEDULED WORKSHOPS FOR HOMEOWNERS, A SPEAKER'S BUREAU, AND/OR TRAINING PROGRAMS FOR LANDSCAPE PROFESSIONALS. PROGRAMS CAN BE TARGETED TOWARD HOMEOWNERS, LANDSCAPE PROFESSIONALS, AND/OR NON-RESIDENTIAL USERS. A PROVIDER THAT IMPLEMENTS MULTIPLE ADULT PROGRAMS/EFFORTS MAY BE ELIGIBLE TO RECEIVE CREDIT FOR MORE THAN ONE WATER CONSERVATION MEASURE IF THE PROGRAMS/EFFORTS CAN BE SHOWN TO BE SEPARATE AND DISTINCT FROM ONE ANOTHER (I.E., A PROVIDER

THAT MAINTAINS AN ACTIVE SPEAKERS BUREAU AND OFFERS A WORKSHOP SERIES IS ELIGIBLE TO RECEIVE CREDIT FOR TWO WATER CONSERVATION MEASURES).

YOUTH CONSERVATION EDUCATION PROGRAM

THE WATER PROVIDER WORKS WITH SCHOOLS IN ITS SERVICE AREA TO INCREASE STUDENTS' UNDERSTANDING OF WATER RESOURCES AND TO PROMOTE WATER CONSERVATION. THE PROGRAM MAY INCLUDE, BUT IS NOT LIMITED TO, A COMBINATION OF PROVIDING INSTRUCTIONAL ASSISTANCE, EDUCATION MATERIALS, TEACHER EDUCATION, CLASSROOM PRESENTATIONS, AND FIELD TRIPS TO WATER RELATED FACILITIES. A PROVIDER THAT IMPLEMENTS MULTIPLE YOUTH PROGRAMS MAY BE ELIGIBLE TO RECEIVE CREDIT FOR MORE THAN ONE WATER CONSERVATION MEASURE IF THE PROGRAMS CAN BE SHOWN TO BE SEPARATE AND DISTINCT FROM ONE ANOTHER (I.E., A PROVIDER THAT OFFERS FREE WATER CONSERVATION SCHOOL ASSEMBLIES WITH ACCOMPANYING PRINTED MATERIALS FOR ELEMENTARY SCHOOL STUDENTS AND ALSO DISTRIBUTES A MIDDLE SCHOOL STUDENT ACTIVITY BOOK AND TEACHER GUIDE IS ELIGIBLE TO RECEIVE CREDIT FOR TWO WATER CONSERVATION MEASURES).

NEW HOMEOWNER LANDSCAPE INFORMATION
